EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Maria Eliseeva (43328) on 12/26/2006.

The application has been amended as follows:

Please amend the claims as attached.

Drawings

The drawings are objected to because figure 1, items 5, 38, and 39 lack descriptive labels. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or

"New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 9 both recite a method for recording a region in three dimensions by extracting a region of interest and defining a list of possible specimen locations. The system then defines a list of possible further specimen locations and selects a sub-list of possible further specimen locations in a parallel fashion. A microscope then travels to the possible locations and matches and eliminates locations of specimen based on visibility of the specimen.

The above features, as explicitly recited, and in combination with the other elements of the claim are neither disclosed nor suggested by the nearest prior art of the record.

Prior art Ozeki et al. (4674046) discloses a topographic imaging means that finds parallel slices of the image but does not disclose the specifics of the independent claims.

Prior art Echerer et al. (5740267) discloses an image analysis method that uses landmarks and finds features within an medical image. However, Echerer does not disclose the specifics of the independent claims.

Prior art Green (5696837) discloses a method for microscopy that has a movement means but does not disclose the specifics of independent claim 1.

Prior art Crawford (4989142) discloses a method of creating three dimensional images from two dimensional slice images. But does not disclose the specifics of the independent claims.

Prior art Kamentsky et al. (5107422) discloses a method for finding characteristics of a neighborhood of pixels but does not disclose the specifics of the independent claims.

Prior art Migdal et al. (6205243) discloses a method of creating a mesh of an object but does not disclose the specifics of creating a list as disclosed in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hadi Akhavannik whose telephone number is 571-272-8622. The examiner can normally be reached on 10:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Mancuso can be reached on (571)272-7695. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
